IRIS.

ENGLISH (I. anglica or Xiphioides).

For brilliancy of colour and fine vigorous foliage the English Iris takes rank among the handsomest of flowering bulbs. They greatly resemble the Spanish Iris in style of growth, attaining a height of about two feet, and produce, during June and July, a succession of large and beautiful flowers.

No.		s.	d.

3	,, 12 ,, 12 ,, ,,	2	6
4	Extra choice mixed varieties .. per 100, 6*s.*; per doz.	1	0

SPANISH (I. hispanica or Xiphium).

The varieties in this section are perfectly distinct, and produce their rich self and particoloured flowers about a fortnight earlier than *Iris anglica*.

LILIUM.

No.		Each—*s.*	*d.*
1	ALTERNANS, SIEB. This Japanese novelty is without doubt a distinct species, belonging to the *Thunbergianum* section. The petals are of a dark orange colour, shaded with yellow, and striped towards the base with brown. It blooms about the middle of July, 1½ ft.	12	0
2	AURANTIACUM or CROCEUM (*Orange Lily*), 3 ft. . . per doz., *3s.* *6d.*	0	4
3	,, MAJOR, orange, 3 ft.	0	6
4	,, MINOR, orange, 2 ft.	0	6
5	,, PRÆCOX, orange, 3 ft.	1	0
6	,, SIBERICUM, orange, 3 ft.	0	9
7	,, TENUIFOLIUM, orange, 3 ft.	0	6
8	AURATUM (*L. speciosum impériale, Sieb.*). This lovely and fragrant golden rayed Japanese Lily, the queen of this wondrous race, is now known in every garden where plants of value and beauty are regarded with admiration . . . . . 2*s.* 6*d.*, 3*s.* 6*d.*, 5*s.*, 7*s.* 6*d.*, &	10	6
9	,, RUBRO-VITTATUM. This variety is similar in its general character to the preceding; its great distinctive feature is, that instead of yellow bands, as in the ordinary variety of *Auratum*, the bands are red, and consequently very fascinating and attractive, the spots are also larger, and of a very bright colour	42	0
10	AURATUM ATTRACTION		
11	,, BEAUTY		
12	,, DIADEM		
13	,, MATCHLESS		
14	,, SPLENDOUR		
15	,, SUNBEAM		

Mr. William Bull has flowered several thousands of *Lilium auratum*, and among them a few of extraordinary beauty have been found; these may be relied upon as being extremely fine—indeed, only such as are of especial merit and very distinct have been selected, otherwise nothing would be easier than to multiply varieties of this Lily, for it is well known that, however great the general resemblance, scarcely two produce flowers exactly alike; but although varying one from the other, the difference is generally not sufficient to warrant a name other than the original being given; the striking beauty, however, of these varieties justly entitle them to that distinction. — 31 6

GLADIOLUS.

This beautiful tribe of plants should be largely planted everywhere, because :—

They are perfectly hardy, easily grown, and gorgeously beautiful.
Their handsome spikes of flowers are useful for cutting.
When cut and placed in water, the flowers expand, and last a long time.
Planted in pots, they are effective for conservatory decoration.
In borders, among evergreens, they are charming.
Plantsd by hundreds among Rhododendrons, they brighten and enliven the beds during the summer and autumn months.
For decorating vases and epergnes, Gladiolus spikes are invaluable.
Gladioli have so many recommendations, that scarcely too much can be said in their favour.

There are few flowers moro showy and beautiful than the Gladiolns, and the varieties of the *Gandavensis* scotion (of which the following is a complete List) are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers developing themselves successively, never fail to win admirers. Tho luxuriant combination of colour in some varieties is extremely charming, while the delicate hues and clearly defined stripes and blotches in others, associated with tho brilliant and distinct coloured kinds, present a picture that the most accomplished artist, with all his art, would fail faithfully to delineate, or the pen, however ably guided, impressively describe.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some :—

The best and safest time for planting is from the beginning of April to tho end of May, when a continuous bloom may be insured from July to September.

Soil is not so much a point for considsration, so long as it is not stiff and consolidated; but it is important that it should be deeply dug previous to planting.

Large bulbs should bo planted from 3 to 4 inches, and smaller bulbs 2 inches, deep.

During excessive dry weather, copious waterings are recommended.

When any bulbs show signs of growth before the time mentionod abovo, they should be potted and kept in a cool frame until the propor season for planting out.

N.B.—Not less than 6 bulbs supplied at the price quoted per dozen, and 50 bulbs at the price quoted per hundred.

GLADIOLUS (HYBRIDS OF GANDAVENSIS).

No.	*Can be supplied as follows :—*	
1	Assortment of 50 New and extra choics varieties, by name . . .	5 guineas
2	,, 25 New and extra choice varieties, by name . . .	2½ guineas

NOVELTIES OF 1868-69.

No.

272 ABEL CARRIÈRE, large expanded bright red flowers, with carmine spots; fine plant

273 ANTONIUS, a charming little plant, producing a fine spike of large well-opened flowers, cherry coloured red, slightly tinged with orange, flamed with carmine, and spotted with pure white

274 ARGUS, long spike of large well-expanded flowers, of a brilliant fiery red, the centre and lower divisions pure white; a splendid variety

275 BARON KILLISCH DE HORN, a fine dwarf variety, flowers well formed, light red, flamed vermilion, and spotted with amaranth

276 BUFFON, long spike, covered with handsome brilliant red flowers

277 CIRCÉ, fine spike of large well-expanded and perfect flowers, of a fine rose colour, slightly tinged with lilac, largely flamed with bright carmine, centre well lighted

278 CORNÉLIE, fine spike of large light cherry coloured flowers, centre very clear, and gradually darkening towards the margin

279 DUC DE MONTEBELLO, flowers large and well expanded, of a rosy orange colour, tinged with white, and large white spots, traced with carmine

280 E. G. HENDERSON, handsome well-formed flowers, of a light rose colour, with dark rose stripes, and large carmine stains

281 FÉNÉLON, very long spike of large well-expanded flowers, of delicate rose colour, slightly tinged with violet, and flamed with deep carmine

282 FRANCIS I., dwarf variety, with white flowers, striped and spotted with carmine

283 HOMER, a magnificent variety, of vigorous growth, producing very long spikes of large perfect flowers of light amaranth, flamed with bright purple

284 ISIS, large flowers, of perfect form, colour bright red, with fine pure white spots

285 JENNY LIND, a charming and beautiful variety, spike long, flowers large, of a delicate rose colour, with a clear centre, and flamed with rosy carmine

286 MADAME DESPORTES, very vigorous plant, large and wide spike, flowers large, well expanded, pure white, the inferior divisions slightly striped with violet

287 MADAME DOMBRAIN, a splendid dwarf variety, long spike of large and perfect flowers, elegantly arranged on the spike, colour violet carmine, flamed with bright purple

288 MADAME DUCLOS, a handsome variety, very long spike, large flowers, of fresh rose colour, slightly stained with darker rose

289 MADAME LANNAU-ROLLAND, beautiful ivory white flowers, lower divisions spotted with gooseberry red on a light yellow ground

GLADIOLUS—Continued.

No.

290 Mary Stuart, a most perfect and beautiful variety, very long spike of large and well-expanded flowers, white, slightly tinged with rose colour, and flamed brilliant carmine

291 Michel-Anoe, the most remarkable novelty of the season; vigorous grower, long spike, large and fully expanded flowers elegantly arranged round the spike, of a deep crimson colour, white spots, and slightly flamed with brownish purple on the upper petals; centre well lighted, extra

292 Monsieur Legouvé, a superb and effective variety; very long spike of large perfectly formed flowers, of a bright red colour, the superior divisions divided from the inferior by a white line, the latter marked with pure white spots

293 Montaigne, a very fine dwarf variety; long spike of large, perfect, and well-expanded flowers, of a bright red colour

294 Picciola, handsome and vigorous-growing variety, with beautiful shining rose coloured flowers, flamed with brilliant carmine rose, clear centre, the lower petals completely covered with pure white spots

295 Prince of Servia, vigorous plant; flowers violet purple, stained with white and carmine

296 Racine, a beautiful variety; very long spike of cherry coloured flowers, tinged with violet, with a clear white centre, and each petal marked with white lines

297 Robert P. Ker, long spike of well-formed and very handsome light rose coloured flowers, darkening to the edge of the petals, with violet spots on a yellowish ground

298 Robinson, a handsome variety with red flowers, spotted white

299 Romulus, spike long, flowers large and pretty, of a brilliant brownish red colour, with large pure white spots, and white lines on the inferior divisions

300 Schiller, a vigorous and handsome variety, producing long spikes of large well-expanded flowers, of a sulphur yellow colour, with large carmine spots

301 Theodorus, a dwarf variety, with gooseberry red coloured flowers and white spots

302 Thomas Methven, large well-expanded flowers, violet tinged with rose, clear centre, and the margin of the petals a dark violet carmine

303 Timothy Trim, a very handsome and vigorous variety, with rose coloured flowers, lined with white, and spotted with dark rose

304 Van Dyck, long spike of large amaranth red flowers, striped with white

305 Virgil, a superb variety, producing long spikes of bright fiery red flowers.

NEW VARIETIES OF 1867.

306 Alexander, large flowers, of fine form, colour bright red

307 Benoiton, large and very beautiful light straw coloured flowers

308 Bernard de Jussieu, large and fully expanded flowers of great beauty; colour violet, shaded and tinted with cherry and purple, and stains of purple on a white ground

309 Citrinus, a medium-sized flower, the upper petals of a light yellow, and the lower of a dark yellow colour

310 Czar Alexander, large well-formed flower, of a beautiful rose, flamed with dark carmine

311 Etendard, large, well-expanded, and perfectly formed flowers, produced on very long spikes; colour white, slightly flamed with lilac or bluish violet

312 Eugène Scribe, very large flowers of perfect form, of a delicate rose colour, flamed with carmine

313 Evrard de St. Jean, an effective variety, with large shaded and striped red flowers

314 Gloire de France, pale rose coloured flowers, striped and marked with rose and violet

315 Henrietta, a very pretty dwarf variety, with large finely formed flowers, white, tinted and flamed with lilac

316 Isabella, very fine spike of pure white flowers, with large dark violet carmine stains

317 La Favorite, large flowers, rose, flamed with carmine, lower petals light yellow

318 La Fiancée, very pretty, large, and well-formed pure white flowers, with small bluish violet spots

319 Leonora, large, perfectly formed flowers of a cherry red, slightly tinted with orange

330 Oscar, brilliant cherry coloured flowers, spotted white, large and well formed

331 Princess Alice, a first-rate dwarf variety, with large, well-expanded, and perfect flowers, colour lilac, slightly tinged with rose, and large white blotch

332 Rossini, very long spike, large and perfect flowers, dark amaranth red, veined and blotched with white

333 Semiramis, a splendid variety; carmine rose colour, white centre, flamed with brilliant carmine, spike long, flowers large and perfect

334 Stella, flowers large, white, tinted with yellow and rose, and flamed with rosy carmine

335 Sultan Abd-ul-Aziz, white, striped with rose, and blotched with carmine

336 Thalie, large flower, of good form, white, flamed with lilac, and striped with carmine

337 Thunbero, very large and well-shaped flowers, clear orange cerise, with large pure white spots

338 Ulysse, large flowers, of a beautiful rose colour

339 Urania, a beautiful variety, with large and well-expanded flowers, pure white, exquisitely flamed with bright rosy carmine

340 Von Siebold, nankeen, beautifully flamed with red.

GLADIOLUS, DWARF VARIETIES.

These are very dwarf-growing varieties, the result of hybridisation between the original types of Gladiolus *venustus*, *trimaculatus*, *cardinalis*, *tristis*, &c., and include most brilliant and varied colours. The flowers of these hybrids are characterised by three large spots, and are in each sort of a different colour. It is almost impossible to form a correct idea of the extreme beauty and diversity of these charming miniatures, which merit all the attention that can be bestowed upon them. When grown in pots they are exceedingly attractive.

Plant in the open ground during the month of October, and cover during severe weather with leaves or litter; their cultivation is therefore very simple. This, added to the many other qualities they possess, will cause them to become the admiration of every lover of this beautiful tribe of plants.

GLADIOLUS, HYBRIDS OF RAMOSUS.

The varieties in this section are not so vigorous as those of Gandavensis, but produce flowers of equally brilliant colours, all beautifully spotted, and are well adapted for cultivation in pots for greenhouse decoration, as also for planting in beds in the open ground, where they have a magnificent effect. They may be planted from November to February, and will bloom from the beginning of July to the end of August, but care should be taken to protect the bulbs from excessive wet or frosty weather.

HOTEIA (SPIRÆA) JAPONICA.

Cannot be too highly appreciated as a decorative plant for early forcing, its pretty erect shining green foliage, surmounted by numerous beautiful and graceful panicles of white inflorescence, giving the whole plant an elegant appearance, and rendering it at once most pleasing and useful for decorative purposes.

Strong imported clumps, 15s. per dozen.

LACHENALIA.

Greenhouse bulbs, producing fleshy spotted leaves, and erect flower stems, bearing racemes of pendent flowers. All the varieties are pretty, and easily cultivated.

,, **THUNBERGII**, new Japanese variety	1	0
The Hemerocallis, or *Day Lilies*, are very handsome and effective hardy border plants.		

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

	Each—*s.*	*d.*
HEPATICA ANGULOSA, flowers sky blue, frequently as large as a crown piece; a plant that ought to be in every garden, new . . . . . 2*s.* 6*d.* &	3	6
HYACINTHUS AMETHYSTINUS, a pretty small hardy species of Hyacinth, with amethyst blue flowers	1	0
HYPOXIS ELEGANS, white flowers, with purple centre	1	0
,, **STELLATA**, large white star-shaped flowers	1	0
,, **VILLOSA**, fine yellow flowers	1	0

Very beautiful plants for pot culture, in a cool greenhouse.

IMANTOPHYLLUM MINIATUM, a very excellent evergreen warm greenhouse or cool stove plant, intermediate between Clivia and Vallota, or Amaryllis, in style of growth, with dark green leaves, and large corymbs of erect, large, clear, rich salmon or light flame coloured cup-like blossoms (relieved by a lighter centre) during the early winter and spring months; unique in its character, and the most effective and beautiful plant in its season of bloom, each, 5*s.*, 7*s.* 6*d.*, 10*s.* 6*d.*, 1, 1½, & 2 guineas

,, **CYRTANTHIFLORUM**, like the preceding in its general habit and growth, but the flowers are a shade lighter in colour, and instead of being erect, are pendulous. Strong blooming plants, each, 5*s.*, 7*s.* 6*d.*, 10*s.* 6*d.*, 1, 1½, and 2 guineas

ISMENE AMANCAES, yellow	5	0
,, **CALATHINA**, large white fragrant flowers, very beautiful	0	6
,, **UNDULATA**, white	0	6

Warm greenhouse bulbs, of great beauty, and very fragrant funnel-shaped flowers, also adapted for out-door decoration during summer.

LEUCOJUM ÆSTIVUM PRÆCOX (*Summer Snowflake*), white	0	9
,, **AUTUMNALE**, bell-shaped white flowers, tinted rose	0	9
,, **PULCHELLUM**, white	0	6
,, **VERNUM** (*Spring Snowflake*), white . . . . . per doz., 5*s.*	0	6

Very beautiful and graceful hardy plants, resembling the Snowdrop, which should be grown in every garden.

LITTONIA MODESTA, a beautiful new greenhouse climbing plant, with graceful pendant bell-shaped flowers, of a rich orange colour, blooming during the summer months . .	3	6
LYCORIS AUREA (*The Golden Lily*), a very rare golden yellow Amaryllis . . .	3	6
MORÆA EDULIS, small Iris-like pinkish lilac flowers	0	6
,, **JUNCEA**, yellow and brown, very pretty	0	6
,, **PAPILIONACEA**, beautiful scarlet	1	0
,, **SISYRINCHIUM**, rich deep blue, marked with white, beautiful and distinct .	0	9

Exceedingly pretty half-hardy bulbous plants, closely allied to Ixia, and may be readily cultivated under similar conditions.

	Per doz.—*s.*	*d.*
MUSCARI BOTRYOIDES CÆRULEA (*Grape Hyacinth*), deep blue	1	0
,, ,, **ALBUM**, white, scarce	3	0
,, ,, **PALLIDUM**, pale blue	3	0
,, **COMOSUM** (*Tasselled Hyacinth*), pale blue	2	0
,, ,, **ATROCÆRULEUM**, dark blue	3	0
,, **MOSCHATUM** (*Musk Hyacinth*), brownish yellow	5	0
,, ,, **MAJOR**, brownish yellow	5	0
,, **PLUMOSUM** (*comosum monstrosum*), Feathered Hyacinth, blue . . .	2	0
,, **RACEMOSUM** (*Starch Hyacinth*), blue, very beautiful	2	0

Early-blooming dwarf hardy plants, thriving in almost any ordinary garden soil; they are perfectly hardy and very attractive.

	Each—*s.*	*d.*
OPHRYS ATRATA, greenish brown	1	0
,, **FERRUM EQUINUM**	1	6
,, **FUSCA**, brown		0
,, ,, **TRICOLOR**		0
,, **IRICOLOR**	1	6

,, REVOLUTUM, white	5	0
,, SPLENDENS	1	0
,, THYRSOIDES, white	1s. 6d. &	2 6
,, UMBELLATUM, white	per doz., 1s.	0 2

These very showy hardy bulbous plants are popularly known as the *Star of Bethlehem*, are exceedingly effective when planted in groups, and are very handsome pot plants.

PANCRATIUM HIRSUTUM, white	5	0
,, ILLYRICUM, white, very fragrant, hardy	1	6
,, MARITIMUM, white, beautiful	0	9
,, MEXICANUM, white	2	6
,, PARVIFLORUM, white	1	0

A very fine genus of greenhouse bulbs, producing their large corymbs of fragrant white flowers early in spring and summer.

PARDANTHUS SINENSIS (*Leopard Flower*), a very handsome hardy Iridaceous plant, with beautiful orange flowers	1	0
PENTLANDIA MINIATA, beautiful greenhouse bulb, with drooping bell-shaped deep crimson flowers	1	6
PHYCELLA (*Phædranassa*) CHLORACRA, flowers crimson, tipped with green	0	6
,, FUCHSIOIDES	1	6
,, GLORIOSA	1	0
,, OBTUSA	1	6

Greenhouse bulbs, blooming in autumn.

RICHARDIA (*Calla*) ÆTHIOPICA (*Trumpet Lily*), well known	1s. &	1 6
,, ÆTHIOPICA COMPACTA, this differs from the preceding, in being much more compact and dwarf in habit. The flowers, which are thrown well above the foliage, are similar to the old variety, but more recurved in the spathe	3	6
RIGIDELLA FLAMMEA, intense scarlet, beautiful	1	6
,, IMMACULATA, deep crimson, distinct	1	6
,, ORTANTHA, rich scarlet	3	6

A genus of small greenhouse bulbs, with bright coloured flowers, well adapted for pot culture.

SARANA KAMTSCHATKA, FISCH. (*The Black Lily*), the remarkable and interesting Black Lily of Kamtschatka	3s. 6d. &	5 0

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

Each—*s.* *d.*

SANDERSONIA AURANTIACA, a new introdaction from Natal. The flowers are of a beautiful rich orange colour, bell-shaped, and particularly graceful; indeed, the whole plant is so charming in habit as to merit the strongest recommendation . . 5*s.* & 7 6

SCHIZOSTYLIS COCCINEA, a beautiful hardy bulbous plant, with brilliant crimson cup-shaped flowers, which are produced successively on spikes during the summer and autumn months . . . . . in pots 1 0

SPIRÆA JAPONICA, *vide* Hoteia, page 28.

SPREKELIA FORMOSISSIMA, *vide* Amaryllis, page 14.

STERNBERGIA LUTEA, *vide* Amaryllis, page 14.

STRUMARIA CRISPA, an interesting half-hardy bulb, allied to Nerine, with narrow rosy lilac flowers 1 0

TIGRIDIA CANARIENSIS, yellow, beautiful . . . . . per doz., 5*s.* 6*d.* 0 6

,, **CŒLESTINA** (*Phalocallis plumbæ*), blue 0 6

,, **CONCHIFLORA**, yellow, spotted with purple . . . per doz., 3*s.* 6*d.* 0 4

,, **PAVONIA**, rich crimson, scarlet, and orange . . . . per doz., 2*s.* 0 3

,, **SPECIOSA**, brilliant orange scarlet . . . . . per doz., 3*s.* 6*d.* 0 4

Well-known and exquisitely beautiful half-hardy bulbs, suitable either for pot culture, or for groups in the flower borders, their large brilliant coloured flowers making them particularly attractive.

TRICHONEMA BULBOCODIUM, purplish lilac 0 9

,, **COLUMNÆ**, blue, very pretty 0 6

,, **FILIFOLIUM**, yellow 1 0

,, **RAMIFLORUM**, purple 0 9

,, **SPECIOSUM**, satiny rose 0 6

Very pretty, small, half-hardy bulbs, with long grass-like leaves, and brilliant coloured flowers.

TRICYRTIS HIRTA, a fine hardy plant from Japan, with white flowers, richly spotted with purple 1 0

,, ,, **FLORE-NIGRO**, a new variety, also from Japan, introduced by M. Maximowicz. It grows about 18 inches to 2 feet in height, and produces freely during the autumn, from the axils of the leaves, large flowers, nearly black, blotched with white 2 6

TRILLIUM GRANDIFLORUM, a most valuable herbaceous plant, with pretty dark green foliage, and large conspicuous white flowers 1 6

TRITELEIA PORRIFOLIA, a beautiful new bulbous plant, from Chili, with long narrow foliage, and pale bluish violet flowers 2 6

,, **UNIFLORA**, valuable for the decoration of flower borders in spring, flowers delicate lilac . . . . . per doz., 2*s.* 0 3

TRITOMA MEDIA, rich orange scarlet 1 0

,, **ROPERII**, orange scarlet 1 6

,, **UVARIA**, flowers bright red, passing to a rich orange scarlet . . . 1*s.* & 1 6

,, ,, **GRANDIFLORA**, scarlet and yellow . . . . 1*s.* 6*d.* & 2 6

Most magnificent autumn-flowering plants, throwing up brilliant-coloured spikes of bloom, from 18 inches to 2 feet long.

TRITONIA AUREA, *vide* Crocosmia aurea.

TROPÆOLUM AZUREUM, blue, rare . . . . . 3*s.* 6*d.* to 5 0

,, **BRACHYCERAS**, yellow 2 6

,, **PENTAPHYLLUM**, red and green 1 6

SUNDRIES.

Mushroom Spawn, best quality. Per bushel, 5*s.*

Tobacco Paper, best manufacture. Per lb., 1*s.* 6*d.* and 2*s.*

Archangel Mats, large size and best quality. Each, 2*s.*; per dozen, 21*s.*

Cuba Bass, best quality (for tying plants). Per lb., 2*s.* 6*d.*

Japanese Flax, a very useful material for tying plants. Per lb., 2*s.* 6*d.*

Shreds. Per lb., 8*d.*

Wall Nails, cast iron, various sizes. Per lb., 3*d.*

MR. WILLIAM BULL

BEGS TO INVITE

AN INSPECTION OF HIS WINTER GARDEN,

To view one of the most remarkable sights ever witnessed in Grape-growing.

The Vines, which are festooned over the entire building, covering an area of upwards of 20,000 superficial feet, spanning 60, with the height of 26, are principally grown for the purpose of partially shading Specimen Plants from the direct rays of the sun.

These Vines, during the fruiting season, are loaded with thousands and thousands of bunches, hanging in almost perfect regularity in every part of the house, and this, with the magnificent specimens beneath, present, as a *coup d'œil*, a combination of use and ornament which Mr. W. B. ventures to think is unsurpassed in this country, or indeed in Europe.

SUPERB NEW LATE GRAPE—MRS. PINCE'S BLACK MUSCAT.

This Grape was awarded a First Class Certificate by the Royal Horticultural Society, and has elicited the praise of numerous eminent Horticulturists. It is essentially a late Grape, possessing a high muscat flavour. It will keep in perfection until April, and is undoubtedly the very best late Grape with true muscat flavour. 10*s.* 6*d.*, 15*s.*, and 1 guinea.

GOLDEN CHAMPION GRAPE.

This extraordinary Grape (a notice of which has appeared in the *Gardeners' Chronicle* and *Journal of Horticulture*) is a seedling raised by Mr. Thomson, of Dalkeith. In constitution it is equal to the *Black Hambro'*, it sets freely under the same treatment, ripens earlier, and will keep in condition when ripe as long as that favourite variety; the bunches are large and well shouldered, berries larger than any Grape known, flavour now and peculiarly rich. A figure of it has been published in the *Florist and Pomologist*. 1, 1½, and 2 guineas.

MADRESFIELD COURT BLACK MUSCAT GRAPE.

This Grape is the production of a cross between the *Black Alicante* and *Muscat of Alexandria*, resembling the former in its bunch, berry, and colour, and the latter in its pure muscat flavour.

It is commended as the best late keeping black muscat Grape, and reputed to hang for a considerable time without shrivelling.

It is a really first-class Grape. 10*s.* 6*d.*, 15*s.*, and 1 guinea.

MARCHIONESS OF HASTINGS.

A white Grape, producing not only huge berries, but also immense bunches, weighing from 8 to 15 pounds each. 1 guinea.

WHITE LADY DOWNE'S GRAPE.

This Grape was raised by Mr. Thomson, of Dalkeith, from the *Black Lady Downe's*. The Vine is of the same vigorous habit of growth as the parent, equally fruitful, sets more freely, requires less heat, and is not liable to scald as the black variety is; keeps as long, if not longer; and has fully as good a flavour. It is guaranteed to be the latest keeping white Grape in cultivation. It received First Class Certificates at the Edinburgh Show, on March 20, 1867, and at Glasgow on the 27th of the same month. 21*s.* and 42*s.*; extra strong, 63*s.*

GRAPE VINES.

The plants supplied are of matured growth, have all been grown from eyes, and the Fruiting Canes are of superlative quality.

Fruiting Canes, 10*s.* 6*d.*, 12*s.* 6*d.*, and 15*s.* each.

Good planting Canes, 5*s.* and 7*s.* 6*d.* each.
